

Huck Magna-Bulb®

A Unique Bulbing Fastener for Superior Blind-Side Strength

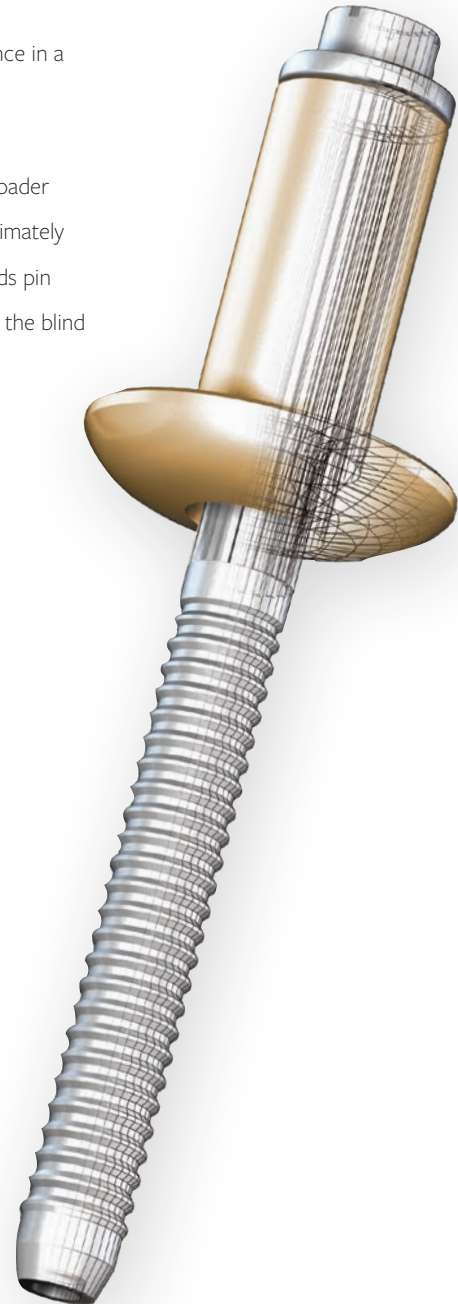

The Huck® Magna-Bulb® was designed to offer high strength and vibration-resistant performance in a wide variety of materials, such as metal, plastic, fiberglass and composite fabrication.

This unique, clamp-type fastener was engineered specifically for blind side sheets, featuring a broader bearing surface. Its bulbing action during installation helps spread the load over a wider area, ultimately creating a stronger, longer-lasting connection. An internal mechanical solid-circle lock design adds pin retention strength while ensuring the highest level of vibration resistance. And the wide bulb on the blind side eliminates pull-through when used in thin materials.

Available Sizes: 3/16", 1/4", 5/16"

Materials: Steel

Headstyles: Protruding, 100° Oval Countersunk

Magna-Bulb Benefits

- Unmatched installation speed
- Low overall installed cost
- Vibration resistant
- Weather-resistant seal
- Quiet non-torque tools
- No repetitive stress injuries
- Eliminates need for secondary operations
- No special training or skills required for operators
